CLOSE ATTACKS

Close attacks are special techniques which can only be used when two fighters are right next to each other. These techniques fall into two basic categories: **THROWS** and **HOLDS**.

THROWS allow you to grab an opponent and toss them across the room. Some fighters can even do throws in mid-air.

For Example: It is possible for Ryu to grab Ken and throw him over his shoulder. To do the *Shoulder Throw*, Ryu must push forward against Ken and then you must push the **Medium or Hard Punch** button on your control pad.

HOLDS allow you to grab an opponent and then hit or bite them again and again.

For Example: It is possible for Blanka to bite Guile on the head. To do the *Head Bite*, Blanka must push forward against Guile and then you must push the **Medium or Hard Punch** button on your control pad.

Practice with your favorite character to discover which throws or holds he or she has.

SPECIAL MOVES

Each character has developed his or her own special moves for use in battle. All the special moves for each character are listed in The World Warriors section of this manual. There are also descriptions telling you how to do these special moves.

Special moves are very powerful, but they are also very difficult to learn. It may take weeks of practice before you will be able to use these moves effectively. So, practice hard and don't give up!

Below is an example of the diagram for Ryu's Fireball. The arrows in the diagram indicate the necessary movements on the control pad. Please refer to the movement diagram if you are unsure of what the arrows mean.

THE TOURNAMENT BEGINS

Twelve fighters from across the globe have come together to face one another to see which of them has the strength, skill and courage to be crowned champion. Each fighter has different skills and special moves, but it will take more than brute strength to earn the title of Grand Master.

Choose **GAME START** on the title screen and you will be able to select your champion for the tournament. As the tournament begins, your fighter will travel the globe to meet one of the twelve other challengers.

(If a friend wishes to challenge you during the tournament, he can press the **START** button on his control pad to interrupt your game.)

When the match begins, you must use your punches, kicks and special moves to knock your opponent flat on his back. Each time you hit him, his energy meter will decrease. Once your opponent's energy meter is totally red, he will be down for the count. Win two out of three bouts and you will be declared the winner and earn the right to face the next challenger.

After the match is finished, the second character from each team will battle each other. This will continue until all the matches have been completed.

Elimination

BECOMING A TRUE STREET FIGHTER

Becoming a true street fighter requires patience and practice. Listed below are a number of hints which will help you survive your first few matches.

1. Use the **Back Defense** and **Defensive Crouch** positions to block attacks.

5. It takes at least three strong hits to make your opponent dizzy. When your opponent is dizzy, inflict as much damage as possible.
6. When you are dizzy, keep on pressing **left** and **right** on the control pad to shake off the stars.
7. Practice using all the characters. This will allow you to know their strengths and weaknesses in battle.
8. Special moves can be blocked using the **Back Defense** and **Defensive Crouch** positions, but it will cost you a little energy.
9. Set the difficulty level in the **Option Mode** to 0 to make it easier to learn how to use your punches, kicks and special moves.
10. Practice putting together a series of moves to create a devastating combo attack. Combinations are the key to becoming a true street fighter champion.

Of noble blood, Vega has successfully blended the Japanese art of Ninjitsu with the skills he learned as a motorist. The result is a beautiful and deadly ballet which has earned Vega the nickname of the "Spanish Ninja."

Vain and egotistical, Vega lives by the philosophy that beauty is strength. Despising anything ugly, Vega views himself as "perfect" and uses a mask to prevent his face from becoming scarred in battle. Used by M. Bison primarily as an assassin, Vega often dispatches his opponents using his claw.
